Period: June 1997 – September 1997

Dabus Dataprodukter AB Lidköping, Sweden
Technical salesman for multimedia products.
Period: May 1995 – October 1996

SPARE TIME

I'm an active person and try to exercise as much as possible. Mountain biking and motor sports are favorite activities. Movies and music are also big interests.

My favorite travel destination is the small island of Ios, Greece. I have spent many summers there and know the locals very well. I'm also trying to learn some Greek, even though it's difficult but challenging.

I'm also heavily involved in the Open Source movement since 1992. A lot of my spare time is dedicated to translate Open Source software to Swedish. I'm mainly involved in the GNOME Project, Debian and Ubuntu Linux. My translation efforts are pro bono but give me a lot of in-depth experience in different areas.

CONCLUSIONS

I have excellent credentials from earlier employments and excellent references from earlier and current managers and colleagues which you are free to contact.
